FISCAL YEAR

STATE EXPENDITURE REPORT NATIONAL ASSOCIATION OF STATE BUDGET OFFICERS

Published Fall 2010

THE NATIONAL ASSOCIATION OF STATE BUDGET OFFICERS, founded in 1945, is the instrument through which the states collectively advance state budget practices. The major functions of the organization consist of research, policy development, education, training, and technical assistance. These are achieved primarily through NASBO's publications, membership meetings, and training sessions. Association membership is composed of the heads of state finance departments, the states' chief budget officers, and their deputies. All other state budget office staff are associate members.

committees—Health and Human Services; Fiscal Management and Reporting; Education; and an annual Critical Issue committee. NASBO is an independent professional and educational association

Association membership is organized into four standing

and is also an affiliate of the National Governors Association.

PREFACE

Since its inception in 1987, the State Expenditure Report has developed into a definitive baseline for the analysis of state spending. This edition of the report includes data from actual fiscal 2008, actual fiscal 2009, and estimated fiscal 2010. Expenditures reflected in this report represent more than 99 percent of total state spending.

Expenditure data are detailed by program area so that trends in state spending can be evaluated. The funding sources for state expenditures also are identified. Readers are cautioned that a more complete understanding of service levels within a given state would require comparisons of spending by both state and local governments, which is not the purpose of this report. In addition, the data are self-reported by the states. Additional information on the report's methodology is provided in the Appendix.

ACKNOWLEDGEMENTS

The State Expenditure Report was produced by Brian Sigritz with assistance from Lauren Cummings, Ben Husch, and Stacey Mazer. In addition, the report represents substantial work by state budget office staff throughout the United States. NASBO thanks the following individuals for their assistance in providing state data for this report:

EXECUTIVE SUMMARY

State Spending Trends, Fiscal 2009 and Fiscal 2010

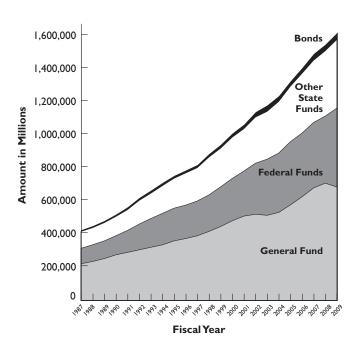

Without question, state expenditures have been significantly impacted by the national recession that began in December 2007. The economic downturn has created a unique and in some ways unprecedented fiscal situation for states. Spending from state funds (general funds and other state funds combined) declined in both fiscal 2009 and estimated fiscal 2010, marking the first occurrences in the 23-year history of the State Expenditure Report. The decline in spending from state funds was precipitated by a rapid reduction in state revenue. During the two-year period from fiscal 2008–2010 state revenues decreased nearly 12 percent, or by \$78.5 billion. It should be noted that not all components of state expenditures have declined during the recent downturn. Spending from federal funds increased sharply in both fiscal 2009 and fiscal 2010. The increase in federal funds is directly attributed to the passage of the American Recovery and Reinvestment Act of 2009 (ARRA). Due to the influx of additional federal dollars, total state expenditures grew modestly in both fiscal 2009 and fiscal 2010. Looking beyond fiscal 2010, states are very concerned that state revenues will not have recovered to pre-recession levels by the time the additional federal funds wind down.

Resulting from a significant reduction in state revenue collections, the component of state spending that has been most negatively impacted by the downturn is general funds. After growing 8.5 percent in fiscal 2007 and 4.2 percent in fiscal 2008, general fund spending declined 3.3 percent in fiscal 2009. The reduction in general fund spending was across-the-board with all seven categories of general fund spending recording outright declines. A similar and in some ways more troublesome pattern has emerged in fiscal 2010. Estimated fiscal 2010 general fund spending declined 5.9 percent compared to fiscal 2009 levels. Once again, the cutbacks were widespread with all categories of spending experiencing declines with the exception of transportation. Spending from state funds (general funds and other states funds combined) also declined both years at 0.2 percent in fiscal 2009 and 3.5 percent in estimated fiscal 2010.

At the same time general fund spending was rapidly declining, federal fund spending experienced sizable increases. After growing a relatively modest 2.9 percent in fiscal 2007 and 2.4 percent in fiscal 2008, federal fund spending increased 17.7 percent in fiscal 2009 and is estimated to have increased 23.4 percent in fiscal 2010. The drastic increase in federal funds can be traced to the infusion of ARRA funds. States reported that they spent \$41.2 billion in federal Recovery Act funds in fiscal 2009 and an estimated \$114.2 billion in fiscal 2010. The growth in federal funds has been so

substantial that total state spending increased in both fiscal 2009 and fiscal 2010, even though state funds declined in both years. Total state expenditures climbed to \$1.55 trillion in fiscal 2009, a 4.6 percent increase, and are estimated to reach \$1.62 trillion in fiscal 2010, a 5 percent increase. This growth is partly a result of increased spending demand, especially in the areas of Medicaid and social services. Even so, the increase in total state expenditures was less than the historical average. Since 1987, total state expenditures have annually increased on average 6.3 percent.

Figure 1
TOTAL STATE SPENDING BY FUND SOURCE,
FISCAL 1987 TO 2009

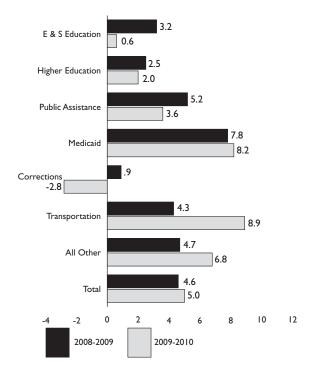

The passage of ARRA in February 2009 produced a shift in the funding sources for state expenditures. In fiscal 2008, the last year before ARRA, general funds accounted for 45.9 percent of total state spending, federal funds were 26.3 percent, other state funds were 25.5 percent, and bonds reflected 2.4 percent of the total. In fiscal 2009, general funds accounted for 42.5 percent of total state expenditures, federal funds 29.5 percent, other state funds 25.6, and bonds were 2.3 percent of the total. The breakdown of total state expenditures has shifted even further in estimated fiscal 2010 with general funds accounting for 38.1 percent, federal funds 34.7 percent, other state funds 24.5 percent, and bonds at 2.7 percent. Therefore, over a two-year period, general funds have shrunk from representing 45.9 percent of total state expenditures to 38.1 percent while federal funds will have risen from 26.3 percent to 34.7 percent. States soon will have to contend with the loss of the additional federal funds as Recovery Act spending begins to wind down in fiscal 2011 and rapidly drops off in fiscal 2012.

Other details of state expenditures include:

- While general fund spending decreased in all spending categories in fiscal 2009 and is estimated to have declined in all but one category in fiscal 2010, federal fund spending increased in all categories in both fiscal 2009 and estimated fiscal 2010.
 Several categories of federal fund spending are estimated to have increases greater than 30 percent in fiscal 2010.
- Medicaid is estimated to replace elementary and secondary education as the largest component of total state spending in fiscal 2010. Total state spending in Medicaid increased by 7.8 percent in fiscal 2009 and an estimated 8.2 percent in fiscal 2010, partly due to increased enrollment brought on by the national recession.
- When looking only at general fund spending, elementary and secondary education remains the largest category in fiscal 2009 at 35.8 percent, with Medicaid second at 15.7 percent. Those two categories, combined with higher education at 11.5 percent, account for nearly two-thirds of general fund spending.
- Elementary and secondary education total expenditures grew by 3.2 percent in fiscal 2009 and by an estimated 0.6 percent in fiscal 2010. Without the influx of federal funds, total K-12 spending would have declined both years. State K-12 funds declined by 0.5 percent in fiscal 2009 and by 5.4 percent in estimated fiscal 2010 while federal funds grew by 20.8 percent and 35.2 percent respectively.
- Higher education grew in both fiscal 2009 and fiscal 2010. Total
 expenditures grew 2.5 percent in fiscal 2009 and are
 estimated to have grown 2 percent in fiscal 2010, due mostly
 to an 11.4 percent increase in federal funds in fiscal 2009 and
 a 16.3 percent increase in fiscal 2010.
- Total public assistance grew 5.2 percent in fiscal 2009 and is estimated to grow 3.6 percent in fiscal 2010. These increases are solely due to additional federal funds. Public assistance represented 1.7 percent of total state expenditures in fiscal 2009.
- Total corrections spending rose only 0.9 percent in fiscal 2009 and is estimated to have declined by 2.8 percent in fiscal 2010.
 As state funds compromise approximately 95 percent of total corrections expenditures, corrections has not been as supported by the influx of federal stimulus spending. Corrections accounted for 3.4 percent of total state expenditures in fiscal 2009.
- Total transportation spending—7.8 percent of total state expenditures—increased by 4.3 percent in fiscal 2009. In fiscal

- 2010, total transportation spending is estimated to have grown by 8.9 percent as a result of a 22.4 percent increase in federal funds.
- Total state spending on capital projects increased by 4.7
 percent in fiscal 2009 and is estimated to have grown by 5.5
 percent in 2010. This is due mostly to ARRA funds and bond
 provisions making it easier for some states to borrow for
 infrastructure.

Components of State Expenditures

This report includes three years of state expenditure data: actual fiscal 2008, actual fiscal 2009, and estimated fiscal 2010. The text primarily focuses on actual fiscal 2009 and examines the seven main functional categories of state spending: elementary and secondary education, higher education, public assistance, Medicaid, corrections, transportation, and "all other." ("All other" is a broad category that includes state functions not tracked individually in this report, such as hospitals, economic development, housing, environmental programs, health programs and the Children's Health Insurance Program (CHIP), parks and recreation, natural resources, air transportation, and water transport). Capital spending is included with operating expenditures within each functional category, unless noted otherwise. Capital expenditures also have been collected separately in the following categories: corrections, environmental

projects, higher education, housing, transportation, and "all other". It should also be noted that twenty-one states use a biennial budget cycle, and in many cases funds are not expended evenly in the two-year cycle. This may affect total expenditures in some states from year to year.

State governments have specific functional responsibilities that vary among states depending on the role of local governments in providing services. For example, in many states, the funding of elementary and secondary education is considered primarily a local function. Some states are exceptions, such as Hawaii where state government fully funds elementary and secondary education. A more complete understanding of programs and service levels within a given state would require comparisons of spending by both state and local government, which is not the purpose of this report. In addition, because the data are self-reported by the states, some may be incomplete. These omissions can affect aggregate and regional tables.

While state balanced budget requirements are diverse, and governors are given significant powers to ensure a balanced budget, states operate within stricter revenue/expenditure limitations than the federal government. An overwhelming majority of states require their governor to submit, and their legislature to pass, a balanced budget. States are required to make spending choices within available resources and must either reduce spending, raise taxes, or use reserves when revenues come in below estimates. For the most part, states cannot incur an operating deficit, and must monitor their debt financing in order to avoid jeopardizing their bond ratings.

Definitions

General Fund: The predominant fund for financing a state's operations. Revenues are received from broad-based state taxes. There are differences in how specific functions are financed from state to state, however.

Federal Funds: Funds received directly from the federal government.

Other State Funds: Expenditures from revenue sources that are restricted by law for particular governmental functions or activities. For example, a gasoline tax dedicated to a highway trust fund would appear in the "Other State Funds" column. For Medicaid, other state funds include provider taxes, fees, donations, assessments, and local funds.

Bonds: Expenditures from the sale of bonds, generally for capital projects.

State Funds: General funds plus other state fund spending, excluding state spending from bonds.

Fiscal 2009 spending by fund source is detailed in Figure 3. General funds decreased as an overall percentage of state expenditures during the fiscal 2008–2010 period. Spending from state general funds was 45.9 percent of total expenditures in fiscal 2008, 42.5 percent in fiscal 2009, and is estimated to be 38.1 percent in fiscal 2010. Conversely, the share of state spending from federal funds has grown from 26.3 percent in fiscal 2008, to 29.5 percent in fiscal 2009, to an estimated 34.7 percent in fiscal 2010. The large growth in federal funds is directly related to the passage of ARRA.

Figure 3
TOTAL STATE EXPENDITURES BY FUNDING SOURCE,
FISCAL 2009

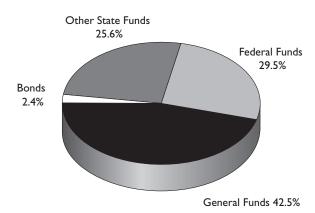

Figure 4 reflects total state expenditures by functional areas. For fiscal 2009, state spending shares are as follows: 21.7 percent for elementary and secondary education; 21.1 percent for Medicaid; 10.4 percent for higher education; 7.8 percent for transportation; 3.4 percent for corrections; 1.7 percent for public assistance; and 33.9 percent for all other.

Figure 4
TOTAL STATE EXPENDITURES BY FUNCTION,
FISCAL 2009

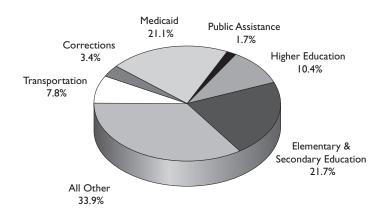

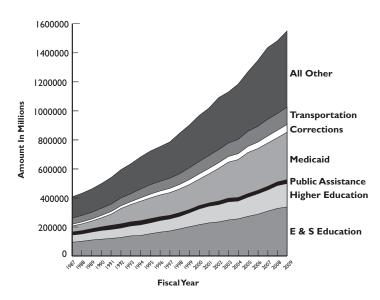

Figure 5
COMPOSITION OF TOTAL STATE EXPENDITURES BY FUNCTION,
FISCAL 1987 TO 2009

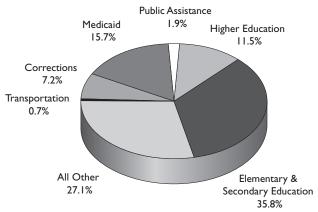

The shares of state spending for the seven functional areas tracked in the State Expenditure Report have shifted since 1987, when the report was first published. For example, Medicaid surpassed higher education as the second largest state program in 1990, and in 2003 it became the largest, displacing elementary and secondary education. Since 2003, Medicaid and elementary and secondary education have alternated as the largest share of state spending. Whereas in fiscal 2009 elementary and secondary education was the largest component, it is estimated that in fiscal 2010 Medicaid will represent the largest share, due to increased Medicaid enrollment and spending resulting from the economic decline. Figure 5 documents the changes in state expenditures by category since 1987. Table 3 reflects shares of state spending in functional areas, by fund source, from 1995 to 2010. Also, Table 5, at the end of the Executive Summary, highlights the share of each state's budget represented by various programs in fiscal 2009 and shows the wide variation among states in their spending patterns.

General Fund Expenditures

Expenditures for elementary and secondary education continue to constitute the largest share of state general fund spending. As Figure 6 shows, in fiscal 2009, 35.8 percent of general fund spending went to elementary and secondary education. Medicaid accounted for 15.7 percent and higher education accounted for 11.5 percent of general fund spending.

Figure 7 reflects the percentage change for general fund spending in each of the functional categories. The impact of the national recession on state spending is clearly illustrated. In fiscal 2009, all

Figure 6
GENERAL FUND EXPENDITURES,
FISCAL 2009

seven categories of general fund spending declined from 2008 levels. A similar pattern emerged in fiscal 2010. All areas of general funding spending, with the exception of transportation, declined even further from fiscal 2009 levels. Overall, general fund spending declined 3.3 percent in fiscal 2009 and is estimated to have declined 5.9 percent in fiscal 2010.

Other State Funds Expenditures

At 17.2 percent, transportation accounts for the second largest portion of other state funds spending for fiscal 2009, second only to the "all other" category. For transportation, these funds largely represent receipts from gasoline taxes earmarked for highways. Significant portions of spending from other state funds also include elementary and secondary education at 10 percent and higher education at 15.8 percent (see Table 3).

Federal Fund Expenditures

As reflected in Figure 8, Medicaid accounts for the largest portion of state spending from federal funds at 42.6 percent. Elementary and secondary education at 12 percent and transportation at 8.1 percent are the next largest categories.

Figure 8
FEDERAL FUND EXPENDITURES,
FISCAL 2008

Regional Spending Trends

Table 4 shows growth rates for each region of the United States, separated by state funds (general fund plus other state funds, not including bond funds) and federal funds. The 2008–2009 growth rate for all states was 4.6 percent in fiscal 2009. In fiscal 2010, total estimated state spending grew 5 percent, with the Mid-Atlantic region having the highest growth rate at 7.7 percent and the Great Lakes region having the lowest at 1.6 percent.

Figure 9 shows the percentage change in state spending from state funds for 2008–2009 and 2009–2010. It is estimated that all but the New England region saw declines in spending from state funds in fiscal 2010. Total state expenditure data can be found on Tables 1–5, along with related footnotes at the end of this chapter:

General Notes

In reviewing the tables, please note the following:

- Small dollar amounts, when rounded, cause an aberration in the percentage increase. In these instances, the actual dollar amounts should be consulted to determine the exact percentage increase.
- "State funds" refers to general funds plus other state fund spending. State spending from bonds is excluded.
- Total funds" refers to funding from all sources—general fund, federal funds, other state funds, and bonds.
- The report methodology is detailed in the Appendix.

All States: Medicaid reflects provider taxes, fees, assessments, donations, and local funds in Other State Funds.

Alabama: Amounts shown in fiscal years 2008 and 2009 are based on actual expenditures during these years, regardless of the year appropriated. Fiscal 2010 amounts shown are equal to appropriations for the year, except for bond proceeds, which are estimated. It is assumed that some level of appropriations will not be expended this fiscal year.

California: Data are based on May 2010 Revision.

Colorado: All actual expenditures reflected conform to state accounting records as reported in the Colorado financial reports.

Connecticut: Bonds data is based on bond allocations by the State Bond Commission.

Indiana: Expenditure figures for "2008 Actual — General Funds" include \$149.7 million of Homestead Credits distributed as part of HEA 1001 (2008), the Governor's property tax reform legislation. The revenue for these expenditures was provided by the 1% increase in the sales tax from 6% to 7%, effective April 1, 2008, which generated \$151.6 million during fiscal 2008. Excluding these expenditures, total General Fund expenditures for fiscal 2008 would have been \$12,730 million (instead of \$12,880 million). Expenditure figures for "2009 Actual — General Funds" include \$1,122.4 million of appropriations made in HEA 1001 (2008), the Governor's property tax reform legislation. The revenue for these expenditures was provided by the 1% increase in the sales tax from 6% to 7% (\$879.0 million), the racino wagering tax (\$62.8 million),

the riverboat admissions tax (\$12.8 million), and the motor vehicle excise tax and FIT (\$13.0 million). Excluding these appropriations, total General Fund expenditures for fiscal 2009 would have been \$11,915 million (instead of \$13,037 million). Expenditure figures for "2010 Estimated – General Funds" include \$1,085.3 million of appropriations made in HEA 1001 (2008), the Governor's property tax reform legislation. Excluding these appropriations, total General Fund expenditures for fiscal 2010 would have been \$11,830 million (instead of \$12,915 million). As requested, expenditure figures for "2009 Actual and 2010 Estimated – Federal Funds" include American Recovery and Reinvestment Act (ARRA) expenditures.

Michigan: Fiscal 2008 general funding spending is artificially high, distorting year-to-year comparisons, due to the deferral of partial fiscal 2007 payments to higher education institutions. Adjusting for this one-time action results in nominal expenditure changes of 4.4% (Total Funds) and -9.1% (General Fund) from fiscal 2008 to fiscal 2009.

Missouri: Total expenditures exclude refunds. Fiscal 2008 expenditures exclude refunds of \$1,307 million, including \$1,258 million general revenue. Fiscal 2009 expenditures exclude refunds of \$1,488 million, including \$1,441 million general revenue. Fiscal 2010 estimates exclude refunds of \$1,548 million, including \$1,469 million general revenue. Other funds include federal reimbursements received by the Department of Highways and Transportation and the Department of Conservation which have constitutionally created funds.

Montana: Fiscal 2008 total expenditures reflect over \$220 million in various one-time-only general fund expenditures including nearly \$96 million for a \$400 tax rebate and \$50 million general fund for fire fighting. Fiscal 2009 total expenditures reflect \$46 million in various one-time-only general fund expenditures. Principal and interest payments on bonds are included in total expenditures. Capital expenditures are not reported separately but are included in total expenditures.

Nebraska: Fiscal 2008, fiscal 2009, and fiscal 2010 totals reflect actual expenditures for each of the spending categories.

New Jersey: Totals include pension, post retirement medical, debt service on pension bonds, payroll taxes, and health benefits expenditures which total \$1.18 billion in State General Fund in fiscal 2009 and \$1.32 billion in fiscal 2010 spread across Education, Corrections, Transportation and All Other.

New York: New York budgets most employer contributions to employees' benefits and pensions centrally. The portion of employer contributions to employees' benefits not distributed to an expenditure category has been included in the All Other Expenditures category. Fiscal 2009–10 spending is adjusted to exclude the impact of paying the end-of-year school aid payment from 2009–10 in the first quarter of 2010–11, as authorized in statute.

North Carolina: North Carolina was unable to provide complete expenditure figures for estimated fiscal 2010 in both the Public Assistance and All Other categories.

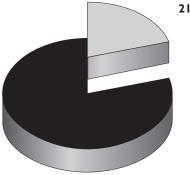

South Carolina: Estimated capital expenditures are no longer collected. Therefore, no capital expenditure data is included for estimated fiscal 2010.

Rhode Island: Fiscal 2010 estimated bond payments are based on year-to-date expenditures.

Tennessee: Tennessee collects personal income tax on income from dividends on stocks and interest on certain bonds. Tax revenue estimates do not include federal funds and other departmental revenues. However, federal funds and other departmental revenues are included in the budget as funding sources for the general fund, along with state tax revenues.

Utah: All numerical information presented represents bond "expenditures". All bond information included in the report is for General Obligation bonds. Not included in the report is State Building Ownership Authority (SBOA) Revenue Bonds or Board of Regents Revenue Bonds.

CHAPTER ONE ELEMENTARY & SECONDARY EDUCATION

21.7% of State Expenditures

State elementary and secondary education expenditures totaled \$335.3 billion in fiscal 2009, a 3.2 percent increase over the previous year. However, this increase was driven by federal funds. Federal funds increased by 20.8 percent in fiscal 2009, while state funds (general funds and other state funds combined) declined by 0.5 percent. The federal increase was mainly due to the education funds included in the *American Recovery and Reinvestment Act of 2009 (ARRA)*. In fiscal 2009, states received \$8.2 billion in ARRA funds for elementary and secondary education, mostly through ARRA's State Fiscal Stabilization Fund.

The education funds included in ARRA had an even a larger impact on elementary and secondary education spending in fiscal 2010. Federal funds are estimated to have increased 35.2 percent in fiscal 2010, while state funds are estimated to have declined 5.4 percent. States estimate that they received \$25.2 billion in ARRA funds for K–12 in fiscal 2010, helping lead to a 0.6 percent overall increase in elementary and secondary education spending.

In fiscal 2009, general funds comprised 70.1 percent of state elementary and secondary education spending, federal funds comprised 16.4 percent, other states funds comprised 11.8 percent, and bonds comprised 1.7 percent. In fiscal 2010, general funds are estimated to comprise 65.4 percent, federal funds 22 percent, other state funds 11.6 percent, and bonds 1 percent. Federal funds have grown from representing 14 percent of overall K–12 expenditures in fiscal 2008 to 22 percent in fiscal 2010, demonstrating states growing reliance on federal dollars to fund elementary and secondary education.

While historically the largest category of total state spending, K–12 education and Medicaid are now roughly equal. In fiscal 2009, elementary and secondary education comprised 21.7 percent of total state spending, with Medicaid comprising 21.1 percent. It is estimated that in fiscal 2010 Medicaid will replace K–12 as the largest component of total state spending at 21.8 percent, while elementary and secondary education will represent 20.8 percent.

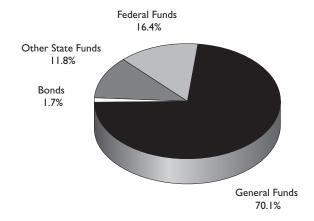

Sources of Funding

State funding systems for education vary greatly. Over the years, a number of states have moved toward increasing their share of funding for elementary and secondary education by substituting state funds for local funds, often in order to reduce local government's reliance on property taxes. Funds are distributed to schools both through general funds on a per-pupil basis and as categorical grants to support specific programs or needs. The federal share is typically a source of supplemental funding for poor school districts and also helps pay the cost of educating children with special needs. However, federal funds through ARRA have mostly been used to maintain basic educational services.

Fund Shares

Relative fund shares for 2009 are shown in the figure below.

Figure 10
STATE EXPENDITURES FOR ELEMENTARY AND SECONDARY
EDUCATION BY FUND SOURCE, FISCAL 2009

Regional Expenditures

The following table shows percentage changes in expenditures for elementary and secondary education for fiscal 2008–2009 and 2009–2010 by region.

Elementary and Secondary Education— Expenditure Exclusions

When comparing resources spent on elementary and secondary education, it is important to understand the types of programs states exclude from these figures. For this report, 14 states wholly or partially excluded employer contributions to teacher pensions and 15 states wholly or partially excluded contributions to health benefits. Additionally, other items that are wholly or partially excluded include: day care programs (43 states), school health care (41), Head Start (33), and libraries (26). Summary expenditure data can be found in Tables 7 through 9, accompanied by explanatory notes. Table 10 lists programs excluded from the expenditure data.

Elementary and Secondary Education Notes

Small dollar amounts, when rounded, cause an aberration in the percentage increase. In these instances, the actual dollar amounts should be consulted to determine the exact percentage increase.

Alabama: Federal funds received directly by local school systems are not reported at the state budget level.

Colorado: Elementary and Secondary education totals include capital expenditures.

Florida: State appropriations to school districts for operational costs include funding intended to be expended by school districts for contributions to current employees' pensions, employee health benefits, and for the operational cost of libraries.

Indiana: Expenditure figures for "2009 Actual and 2010 Estimated – Elementary and Secondary Education (General Funds)" increased in part due to HEA 1001 (2008), the Governor's property tax reform legislation whereby the state assumed the responsibility for funding 100% of the K–12 tuition support formula.

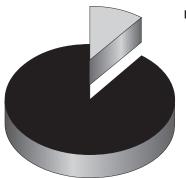

Michigan: Figures reflect K-12 education, the Michigan Department of Education, adult education and pre-school. Employer contributions to current employees' pensions and health

benefits are reported for Department of Education employees but excluded for employees of K–I2 schools. General fund revenue support increased for fiscal 2009 as support from other revenue sources in the State School Aid Fund declined. Federal revenue support increases in fiscal 2009 and fiscal 2010 are largely due to federal ARRA funding for K–I2 and other education programs. Actual ARRA expenditures will be recorded with the fiscal 2010 annual financial report.

Montana: For fiscal 2010, general funds decreased and other state funds increased as a result of Otter Creek Coal Tract Bonus Payment (approximately \$81 million offset to general fund). Additionally, for fiscal 2010 and to a lesser extent fiscal 2009, federal funds increased and general funds decreased due to ARRA SFSF.

Utah: Included with the General Fund is the Education Fund (income tax revenue) which in Utah is restricted by the Utah state constitution for the sole use of public and higher education. Public education in Utah is organized to include the Utah State Office of Rehabilitation (USOR). The numbers reflected in this report for public education include USOR. The USOR amounts are as follows: fiscal 2008 — \$23 million general fund/education fund, \$40 million federal funds, \$1 million other state funds for a total of \$64 million; fiscal 2009 — does not include USOR; fiscal 2010 — does not include USOR.

CHAPTER TWO HIGHER EDUCATION

10.4% of State Expenditures

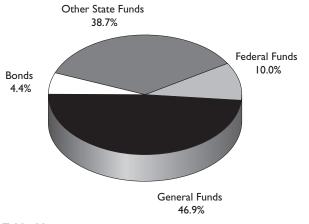

State higher education spending reflects state financial support of public university systems, community colleges, and vocational education institutions. In fiscal 2009, states spent \$161.6 billion on higher education, 10.4 percent of total state spending, and 11.5 percent of overall general fund expenditures. General funds account for 46.9 percent of state spending on higher education, other state funds 38.7 percent, federal funds 10 percent, and bonds 4.4 percent (see Figure 11 and Table 12).

In calculating higher education expenditures for fiscal 2009, 13 states wholly or partially excluded tuition and fees, and 19 states wholly or partially excluded student loan programs. Additionally, other items that are wholly or partially excluded include: university research grants (32 states), vocational education (17), and assistance to private colleges or universities (22). Table 15 lists programs excluded from the expenditure data.

Overall, total state higher education spending grew by 2.5 percent in fiscal 2009. State funds (general funds plus other state funds) grew by a modest 1.4 percent, while federal funds, which typically represent a small share of total higher education spending, grew by 11.4 percent. This trend is being repeated in

Figure 11
STATE EXPENDITURES FOR HIGHER EDUCATION BY
FUND SOURCE, FISCAL 2009

fiscal 2010. It is estimated that state funds grew 0.8 percent in fiscal 2010, while federal funds grew 16.3 percent. The large growth in federal funds is mainly due to the passage of the *American Recovery and Reinvestment Act of 2009 (ARRA)*. In fiscal 2009, states report that a total of \$2.1 billion of the federal funds for higher education were attributable to ARRA. In estimated fiscal 2010, the amount of ARRA funds for higher education grew to \$4.3 billion. States will likely face a decline in federal funds in fiscal 2011 and fiscal 2012 as the ARRA funds begin to wind down. Overall, higher education spending increased 2.0 percent in fiscal 2010, from \$161.6 billion to \$164.8 billion.

Capital Spending

State expenditures for higher education-related construction, renovation and other capital projects decreased by 2.5 percent in fiscal 2009, and are estimated to decrease by 11 percent in fiscal 2010 (see Table 48).

Regional Expenditures

In fiscal 2009, the Rocky Mountain region saw the greatest percentage increase in higher education spending at 15.5 percent, while the Far West region experienced the largest decline, decreasing 8.4 percent (see Table 11).

Financing Issues

While state funds for higher education grew a relatively modest 1.4 percent in fiscal 2009 and 0.8 percent in fiscal 2010, tuition and fees rose at a faster pace. According to The College Board, tuition and fees at four-year public institutions rose 7.9 percent between 2009 and 2010. The large increase in tuition and fees was partly ameliorated by the fact that total grant aid to public students rose 22 percent in 2010, mostly due to an increase in federal Pell grants.

Higher Education Notes

Small dollar amounts, when rounded, cause an aberration in the percentage increase. In these instances, the actual dollar amounts should be consulted to determine the exact percentage increase.

Alabama: Other state funds for Higher Education include tuition and fees as reported by institutions. Bonds issued and expended directly by institutions are not reported at the state budget level.

Florida: The dollar difference for Other State Funds for actual fiscal 2008–09 and Other State Funds for estimated fiscal 2009–10 is mainly attributable to university tuition. University tuition is included in Other State Funds for estimated fiscal 2009–10, but excluded in Other State Funds for actual fiscal 2008–09. Tuition revenue does not get deposited into the state's Treasury, but stays at each university. It is appropriated and reported as an "estimate" for 2009–10, but not reported as an "actual" expenditure of the state for 2007–08 and 2008–09.

State appropriations to public institutions of higher education for operational costs include funding intended to be expended by institutions for contributions to current employees' pensions and employee health benefits. State university tuition and fees appropriated were \$962.7 million for fiscal 2007–08, \$1,022.1 million for fiscal 2008–09, and \$1,180.1 million for fiscal 2009–10. Community College student fees and postsecondary workforce program student fees are not appropriated. Florida appropriates funds for merit and need-based financial aid as well as tuition assistance grants. State appropriations for the University of Florida's Institute of Food and Agricultural Sciences are included in the data reported.

Michigan: General Fund support in fiscal 2008 reflects a one-time increase of \$164.5 million for a one-month payment delay for universities and community colleges occurring in the prior fiscal

year. Federal fund support reflects receipt of TANF contingency revenue for student financial aid: \$109.8 million (fiscal 2008); \$172.9 million (fiscal 2009), and \$78.9 million (fiscal 2010); and federal ARRA funding for colleges, universities and postsecondary education programs. Actual ARRA expenditures will be recorded with the fiscal 2010 annual financial report.

Montana: For fiscal 2010, federal funds increased and general funds decreased due to ARRA SFSF.

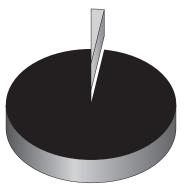

North Dakota: For fiscal 2008 and fiscal 2009, the operating expenditures include all sources that were reported in the audited financial statements. The report instructions said to exclude federal research grants, but they have not been excluded, as they are not identified separately (from other federal funds) in the financial statements. The fiscal 2010 estimates are based on the annual budgets for 2009–10. Actual expenditures, especially in "other state funds", could vary significantly from budgets prepared over a year in advance. "Other state funds" include all sources other than general funds, federal funds, and bond funds. Examples include expenditures paid from tuition and fees, auxiliary services, and other institutional sales, etc. "Bond funds" include expenditures from state and revenue bonds.

Rhode Island: The 2008 final audit showed an increase of \$6.0 million in federal research, a \$0.5 million increase in all auxiliary services, and a \$1.3 million decrease in general tuition and fees.

South Carolina: Estimated capital expenditures are no longer collected. Therefore, no capital expenditure data is included for estimated fiscal 2010.

Utah: Included with the General Fund is the Education Fund (income tax revenue) which in Utah is restricted by the Utah state constitution for the sole use of public and higher education.

CHAPTER THREE PUBLIC ASSISTANCE

1.7% of State Expenditures

Public Assistance Expenditures

This report contains data on cash assistance provided through the Temporary Assistance for Needy Families (TANF) program and other public assistance programs. Spending for these categories totaled \$26.4 billion in fiscal 2009 and represented 1.7 percent of total state expenditures. Spending from all funds for public assistance increased by 5.2 percent from fiscal 2008 to fiscal 2009. Spending from state funds was virtually flat while spending from federal funds increased by 10.6 percent from fiscal 2008 to fiscal 2009.

Total public assistance spending from all funds increased by 3.6 percent in fiscal 2010 to total \$27.3 billion. State funds decreased by 7.4 percent and federal funds increased by 14.1 percent. The large increase in federal funds and the decrease in state funds are attributable to funds received in the American Recovery and Reinvestment Act of 2009 (ARRA). The TANF Emergency Fund, authorized under ARRA, provided up to \$5 billion to states, tribes, and territories through September 30, 2010.

The primary sources of public assistance funding for fiscal 2009 are federal funds, providing 51 percent, followed by general funds at 47.3 percent (see Figure 12). For estimated fiscal 2010, federal funds represent 56.1 percent of the total while general funds are 42.6 percent of the total.

The "other cash assistance" category, which includes optional state programs for Supplemental Security Income (SSI) and General Assistance, are not funded in all states, and when funded, are relatively small programs.

TANF

The Temporary Assistance for Needy Families (TANF) program was reauthorized in February 2006 as part of the Deficit Reduction Act. The TANF block grant is funded at \$16.6 billion each year through fiscal 2010 and is currently being funded under a continuing resolution. Although the program retains the work participation rates of 50 percent for all families and 90 percent for two-parent families, adjusting the base year for the caseload reduction credit effectively increases the work requirements from the prior levels.

The program includes specific definitions of work, work verification requirements, and penalties if states do not meet the requirements. As a result of these changes, most states have to significantly increase work participation rates. Under ARRA, however, the workload reduction credit was modified for two years as well as rules governing unspent TANF funds that are carried forward.

Since welfare reform was initially passed in 1996, states have focused on providing supportive services for families to achieve self-sufficiency rather than cash assistance. Since 1996, caseloads have declined significantly. The average monthly number of recipients fell from 12.8 million prior to the enactment of TANF to 4.3 million by March 2010, a decrease of over two-thirds.

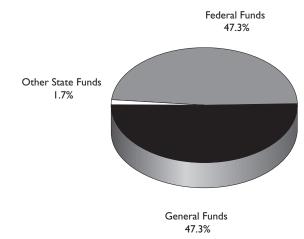

This report has information only on the cash assistance benefit levels within the program which represents approximately 41 percent of total program costs and does not reflect total TANF spending. Of the combined federal and state TANF expenditures of \$25.6 billion in fiscal 2006, states spent \$10.5 billion, or 41 percent of their total expenditures on cash assistance. States spent significant amounts on various noncash services, including work activities (\$2.4 billion), child care (\$3.5 billion), transportation and work supports (\$472 million), administrative and systems costs (\$2.4 billion), and a wide range of other benefits and services (\$6.3 billion), according to the Department of Health and Human Services' Eighth Annual Report to Congress.

Expenditure data on total cash assistance, TANF cash assistance, and other cash assistance can be found on Tables 16–26, accompanied by explanatory notes.

Fund Shares

The figure below provides fund shares for 2009.

Expenditures for Cash Assistance under Temporary Assistance for Needy Families (TANF) Program

State and federal funds for TANF cash assistance expenditures totaled \$16 billion in fiscal 2009, an increase of 5.9 percent from 2008 to 2009 (see Table 23). State funds increased by 5.8 percent and federal funds increased by 5.9 percent from fiscal 2008 to fiscal 2009. For fiscal 2010, total spending for TANF cash assistance expenditures increased by 4.4 percent to \$16.7 billion with federal funds rising by 9.1 percent and state spending decreasing by 5.5 percent.

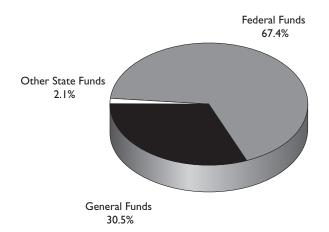

States have provided funding for programs to address childcare services, training and education, transportation needs, transitional rental assistance, substance abuse, job readiness and job retention training, and domestic violence. As cash assistance has declined, these supportive services have gained greater importance in the program.

Expenditure data for TANF cash assistance can be found on Tables 21–23.

Fund Shares

The figure below provides fund shares for 2009.

Expenditures for Other Cash Assistance

The second component of cash assistance for public welfare is other cash assistance, including state participation in the Supplemental Security Income (SSI) program, General Assistance (GA), and emergency assistance. Each state determines the structure of its own program, resulting in significant variations in programs and funding. Some have statewide uniform eligibility rules while others simply require some form of county participation. Thirty-seven states spend some amount on this category of other cash assistance.

Other cash assistance programs accounted for 0.7 percent of total state spending in fiscal 2009. States spent \$10.4 billion for other cash assistance, with 73.3 percent of that amount funded from state general funds. California accounted for close to half of the total spending on other cash assistance.

Expenditure data for other cash assistance can be found on Tables 24–26.

Public Assistance Notes

Small dollar amounts, when rounded, cause an aberration in the percentage increase. In these instances, the actual dollar amounts should be consulted to determine the exact percentage increase.

Colorado: All expenditures conform to state accounting records as reported in the Colorado financial reports. Public Assistance is not reported individually in the CAFR and is not broken out in the report; Public Assistance spending is included in All Other.

Connecticut: Public Assistance figures exclude medical assistance under the State Administered General Assistance Program. Amounts for that purpose were \$171 million in fiscal 2008, \$188 million in fiscal 2009, and \$182 million in fiscal 2010.

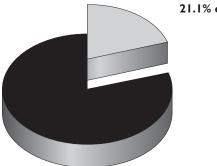

Michigan: "Other Cash Assistance" figures do not include expenditures for child development and care programs, a large part of Michigan's public assistance program. Child development and care expenditures total \$389.2 million in fiscal 2008; \$316.6 million in fiscal 2009; and estimated at \$243.1 million in fiscal 2010. Actual ARRA expenditures will be recorded with the fiscal 2010 annual financial report.

North Carolina: North Carolina was unable to provide TANF figures for estimated fiscal 2010.

North Dakota: TANF – Cash Assistance includes only the direct cash benefit.

West Virginia: The Other Cash Assistance figures include Non-TANF EA expenditures which total approximately \$475,000 to \$600,000 per year and the WV Works Separate State program costs for two-parent families and college. The expenditures for the Two-Parent Families program were \$1,870,761 in fiscal 2008, \$3,300,000 in fiscal 2009 and an estimated \$3,600,000 in fiscal 2010. For the College Assistance program, the expenditures were approximately \$1,006,857 in fiscal 2008, \$1,281,606 in fiscal 2009 and an estimated \$1,200,000 in fiscal 2010. These programs are not claimed on the TANF report and are 100% state funded. The total Other Cash Assistance expenditures are approximately \$3,477,618 for fiscal 2008, \$5,181,606 for fiscal 2009, and an estimated \$4,800,000 for fiscal 2010.

CHAPTER FOUR MEDICAID EXPENDITURES

21.1% of State Expenditures

Medicaid, a means-tested entitlement program financed by the states and the federal government, provides comprehensive and long-term medical care for more than 60 million low-income individuals.

Total Medicaid spending in fiscal 2009 was \$327.1 billion, excluding administrative costs, which represents a 7.8 percent increase over fiscal 2008. State funds decreased by 3 percent and federal funds increased by 16.6 percent over fiscal 2008 amounts.

Medicaid spending for fiscal 2010 is estimated at \$353.8 billion, an increase of 8.2 percent over fiscal 2009. State funds decreased by an estimated I percent while federal funds increased by 14.4 percent over fiscal 2009 amounts. Declines in state funds for fiscal 2009 and fiscal 2010 represent the only declines in general fund state spending for Medicaid in the program's history.

The large increase in federal funds in both fiscal 2009 and fiscal 2010 is attributable to the enactment of the *American Recovery and Reinvestment Act of 2009 (ARRA)* which provides a temporary increase in the Federal Medicaid Assistance Percentage (FMAP). States estimate that \$19.4 billion in fiscal 2009 and \$35.3 billion in fiscal 2010 billion of the federal funds in Medicaid were attributable to the temporary increase in the FMAP under ARRA.

Under ARRA, all states receive a temporary increase in their FMAP as well as additional amounts for those states facing the highest unemployment rates. ARRA is estimated to provide approximately \$103.1 billion to states through the temporary increase in FMAP payments beginning October 2008 and now ending in June 2011—a six-month scaled back extension from what was originally enacted under ARRA. In order to receive the federal funds, maintenance of effort requirements (MOE) include not having more restrictive standards, methodologies and procedures in place than were in place July 1, 2008.

Also included in Medicaid spending are Medicare Part D "clawback" payments, statutorily known as the phased down state contribution. Beginning in January 2006, prescription drug costs for individuals eligible for both Medicare and Medicaid were no longer part of the Medicaid program. Instead these costs are now part of Medicare Part D. States finance these benefits by providing a payment to the federal Medicare trust fund—commonly known as "clawback" payments. As shown in Appendix Table A-3, these "clawback" payments totaled \$7 billion in fiscal 2008, \$6.9 billion in fiscal 2009, and are estimated at \$5.9 billion for fiscal 2010.

Medicaid spending accounted for 21.1 percent of *total* state spending in fiscal 2009. In fiscal 2010, it is estimated to be 21.8 percent of total spending, the single largest portion of total state spending.

Medicaid Enrollment. The downturn in the economy has resulted in significant increases in Medicaid enrollment as it has in previous economic slowdowns. Enrollment growth averaged 8.5 percent in fiscal 2010 with states projecting Medicaid enrollment to grow by 6.1 percent in fiscal 2011, according to the Kaiser Commission on Medicaid and the Uninsured.

Medicaid Cost Containment. Nearly every state implemented at least one new Medicaid policy to control spending in fiscal 2010 and fiscal 2011 with states turning to provider cuts more than any other area, according to the Kaiser Commission on Medicaid and the Uninsured's 2010 annual survey. Provider rates are linked to economic conditions and under budget pressure states are often forced to reduce rates until economic conditions improve. Based on the Kaiser Commission survey, 39 states in fiscal 2010 implemented a provider rate cut or freeze compared to 33 states in fiscal 2009. In fiscal 2011, 37 states have planned provider rate restrictions. In addition, 14 states have planned benefit restrictions in fiscal 2011 which include the elimination of covered benefits as well as the application of utilization controls or limits for existing benefits. As noted in the survey, 20 states implemented benefit restrictions in fiscal 2010, the largest number in one year since the survey began in 2001.

Outlook: National Health Care Reform. Under the Affordable Care Act, enacted in March 2010, Medicaid programs will be expanded to cover non-pregnant, non-elderly individuals with income up to 133 percent of the federal poverty level beginning in January 1, 2014. The cost for those newly eligible for coverage will be fully federally funded in calendar years 2014, 2015, and 2016 with federal financing phasing down to 90 percent by 2020. States are required to apply a 5 percent income disregard when determining Medicaid eligibility, effectively bringing the new Medicaid minimum eligibility level to 138 percent of the federal poverty level.

The Affordable Care Act imposes a maintenance of effort (MOE) requirement on eligibility standards, methodologies, and procedures for adults until an exchange is fully operational in 2014 and for children in Medicaid and CHIP through 2019. There is a limited exception during the period January 1, 2011 through December 31, 2013 for a state that certifies it has a budget deficit on or after December 31, 2010.

While the major expansions to cover the uninsured will not be taking place until January 1, 2014, other changes under national health care reform are affecting health care in states more immediately including: the maintenance of effort provisions for Medicaid and CHIP, a new option to cover childless adults in

Medicaid using the regular Medicaid match, changes to drug rebates under the Medicaid program, new long-term care options for community based care, the establishment of temporary high risk pools in each state until the exchanges are operational, and changes in the insurance markets in every state.

Figure 14, based on August 2010 projections by the Congressional Budget Office (CBO), assumes a 63 percent federal share of total Medicaid costs in 2009. Figures for 1990 and prior years are from the Federal Funds Information for States Issue Brief 94-14, Recent Trends in Medicaid Spending.

Regional Expenditures

The following table shows percentage changes in expenditures for Medicaid for fiscal 2008–2009 and 2009–2010 by region. For 2009, the Southwest region is well above the national average while the Mid-Atlantic region is below the national average.

Additional expenditure data on Medicaid can be found on Tables 28–30, accompanied by explanatory notes.

Note: State funds are defined as general funds and other state funds (bonds are excluded). Source: National Association of State Budget Officers, 2009 State Expenditure Report

Medicaid Notes

States were asked to report Medicaid expenditures as follows: General funds: all general funds appropriated to the Medicaid agency and any other agency which are used for direct Medicaid matching purposes under Title XIX. Other state funds: other funds and revenue sources used as Medicaid match, such as local funds and provider taxes, fees, donations, assessments (as defined by the Health Care Finance Administration). Federal Funds: all federal matching funds provided pursuant to Title XIX.

As noted above, the figures reported as Other State Funds reflect the amounts reported as provider taxes, fees, donations, assessments and local funds by states. State Medicaid agencies report these amounts to the Health Care Financing Administration (HCFA) on form 37, as defined by the Medicaid Voluntary Contribution and Provider-specific Tax Amendments of 1991 (P.L. 102-234). However, some state budget offices are unable to align their financial reporting to separate these costs for the NASBO State Expenditure Report. Thus, this report does not capture 100 percent of state provider taxes, fees, donations, assessments and local funds. Small dollar amounts, when rounded, cause an aberration in the percentage increase. In these instances, the actual dollar amounts should be consulted to determine the exact percentage increase.

The states were asked to separately detail the amount of provider taxes, fees, donations, assessments and local funds reported as Other State Funds.

Alabama: Fiscal 2008 through fiscal 2010 Other State Funds includes provider taxes in the amounts of \$59 million, \$59 million, and \$66 million, respectively.

Connecticut: Medicaid appropriation is "gross funded" — Federal funds are deposited directly to the State Treasury. Connecticut's FMAP is currently at 50 percent, excluding enhanced FMAP available under ARRA(\$403 million in fiscal 2009 and \$539 million in fiscal 2010). Excludes state portion of Qualified Medicare Beneficiaries and School Based Child Health as those expenditures are netted out of federal Medicaid reimbursement. Other State Funds in fiscal 2009 and fiscal 2010 includes retroactive adjustments for facilities at the Department of Developmental Services, which were claimed under the Medicaid program.

Indiana: As requested, expenditure figures for "2009 Actual and 2010 Estimated – Federal Funds" include American Recovery and Reinvestment Act (ARRA) expenditures. For "Medicaid", these increased federal expenditures are partially offset by lower state general fund expenditures.

Maryland: Fiscal 2008 Other Funds include: \$106.7 million in tobacco settlement funds, \$65.0 million in HMO/MCO tax, \$25.8 million in nursing facility assessments, \$13.6 million in provider repayments of audit disallowance, \$7.0 million in local funds, and \$0.9 million in interest from trust fund. Fiscal 2009 Other Funds include: \$125.4 million in tobacco settlement funds, \$102.3 million in HMO/MCO tax, \$44.0 million in nursing facility assessments, \$83.8 million in Medicaid expansion fund, \$10.8 million in lottery over-attainment, \$7.7 million in local funds, and \$0.9 million in interest from trust fund. Fiscal 2010 Other Funds include: \$214.6 million in Medicaid expansion fund, \$117.5 million in tobacco settlement funds, \$115.7 million in HMO/MCO tax, \$45.8 million in hospital assessments, \$42.3 million in nursing facility assessments, \$12.1 million redirected from contributions from non-profit health plan, \$8.0 million in local funds, and \$1.5 million in interest from trust fund.

Michigan: Other state funds include local funds of \$101.0 million, and provider taxes of \$1,022.0 million for fiscal 2008; local funds of \$102.0 million and provider taxes of \$888.0 million for fiscal 2009; and local funds of \$78.0 million and provider taxes of \$743.0 million for fiscal 2010. The decline in provider assessment funds is due to federal ARRA FMAP increase and the elimination of the provider assessment program for HMOs as of April 1, 2009. Increases in federal revenue support are due to increases in federal ARRA/FMAP funding (\$1,042.0 million for fiscal 2009 and \$1,157.0 for fiscal 2010). Actual ARRA expenditures will be recorded with the fiscal 2010 annual financial report. Public health and community and institutional care for mentally and developmentally disabled persons are partially reported in the Medicaid totals.

Missouri: Medicaid data is based on total state Medicaid report. Other Funds include an estimated \$601 million in fiscal 2008, \$829 million in fiscal 2009 and \$708 million in fiscal 2010 of local funds used to match Title XIX. The Missouri Medicaid program was budgeted in fiscal years 2009 and 2010 based on the regular FMAP. Enhanced FMAP earned and claimed under ARRA provisions was deposited into a designated fund, Fund 2000, to comply with state law.

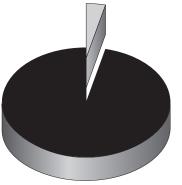

Montana: For fiscal 2009 and fiscal 2010, general fund decreased and federal funds increased due to ARRR enhanced FMAP rate.

Rhode Island: Commencing in fiscal 2009, federal expenditures for Medicaid are inclusive of "pass-through" financing for qualifying LEA-administered special education expenditures.

Tennessee: Regarding premium revenue: fiscal 2008 totals \$70 million, fiscal 2009 totals \$77 million, and fiscal 2010 totals \$221 million. Regarding Certified Public Expenditures – Local fund from

Hospitals: fiscal 2008 totals \$325 million, fiscal 2009 totals \$248 million, and fiscal 2010 totals \$198 million. Regarding Nursing Home Tax: fiscal 2008 totals \$85 million, fiscal 2009 totals \$84 million, and fiscal 2010 totals \$83 million. Regarding the ICF/MR 6 percent Gross Receipts Tax: fiscal 2008 totals \$12 million, fiscal 2009 totals \$21 million, and fiscal 2010 totals \$14 million. Regarding Intergovernmental Transfers: fiscal 2008 totals \$0 million, fiscal 2009 totals \$0 million, and fiscal 2010 totals \$0 million.

CHAPTER FIVE CORRECTIONS EXPENDITURES

3.4% of State Expenditures

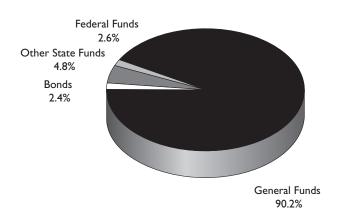

State spending on corrections reflects the costs to build and operate prison systems and may include spending on juvenile justice programs and alternatives to incarceration such as probation and parole. State spending for corrections totaled \$52.3 billion in fiscal 2009, a 0.9 percent increase compared to the previous year. The increase in spending is considerably less than the 6.2 percent spending increase in fiscal 2008. State spending on corrections in fiscal 2010 is estimated to total \$50.9 billion, a 2.8 percent decline from fiscal 2009. As with other areas of the state budget, spending growth on corrections slowed in fiscal 2009 and fiscal 2010 due to widespread revenue shortfalls. Some of the actions states took to rein in spending included closing prisons and other correctional facilities, the early release of prisoners, and employee furloughs.

In fiscal 2009, corrections spending represented 3.4 percent of total state spending and 7.2 percent of general fund spending. General fund dollars are used primarily to fund state corrections spending and account for \$47.2 billion, or 90.2 percent, of all fiscal 2009 state

corrections spending. State funds (general funds and other state funds combined, but excluding bonds) accounted for 95 percent of total state corrections spending in fiscal 2009. Federal funds accounted for 2.6 percent and bonds accounted for 2.4 percent. In fiscal 2010, state funds are estimated to remain by far the largest source of total state correction spending at 93.5 percent. However, in both fiscal 2009 and estimated fiscal 2010 the federal fund growth rate is much higher than that of state funds. Federal funds grew 64 percent in fiscal 2009 and are estimated to grow 44.9 percent in fiscal 2010. In contrast, state funds declined 0.7 percent in fiscal 2009 and are estimated to decline 4.3 percent in fiscal 2010. The large growth rate in federal funds is due to the American Recovery and Reinvestment Act of 2009 (ARRA) providing \$1.3 billion in corrections dollars in fiscal 2009 and an estimated \$1.8 billion in fiscal 2010.

Data on capital expenditures for corrections are displayed in Chapter Eight (Table 49).

Figure 17
STATE EXPENDITURES FOR CORRECTIONS BY
FUND SOURCE, FISCAL 2009

Regional Expenditures

Table 31 shows changes in corrections expenditures by region between fiscal 2008 and fiscal 2009 and between fiscal 2009 and estimated fiscal 2010. Of note, fiscal 2009 corrections spending in the Far West region increased by 17.9 percent, well above the national average of 0.9 percent.

Corrections-Expenditures Exclusions

Some states exclude certain items when reporting corrections expenditures. Twenty-one states wholly or partially excluded juvenile delinquency counseling from their corrections figures and fifteen states wholly or partially excluded spending on juvenile institutions. Seventeen states wholly or partially excluded spending on drug abuse rehabilitation centers and forty-one states wholly or partially excluded spending on institutions for the criminally insane. Twenty-two states wholly or partially excluded aid to local governments for jails. For details, see Table 36.

Corrections Notes

Small dollar amounts, when rounded, cause an aberration in the percentage increase. In these instances, the actual dollar amounts should be consulted to determine the exact percentage increase.

Alaska: Corrections expenditures exclude substance abuse rehabilitation costs including both drugs and alcohol.

Florida: Adjustments were made to fiscal 2008-09 Actual Expenditures based on reductions taken during the 2009 Special Session A. Debt Service is removed from the Corrections totals and is correctly reflected in the All Other category for all three years. During the 2009 Legislative Session, the Legislature reverted \$172.9 million in General Revenue for Fixed Capital Outlay associated with prison construction; authority was provided for the bonding to finish the construction of the prison beds. Fiscal 2008-09 has been updated to account for expenditures associated with the bonding for the construction of a new prison (Blackwater River Correctional Facility) to be privately operated.

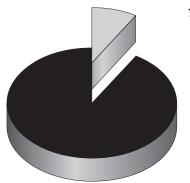

Michigan: Figures include adult inmate and juvenile justice expenditures. Fiscal 2009 spending reflects movement of juvenile offenders from secure placements to community settings, and closing of 3 prisons and 4 camps due to declining inmate population. Increased fiscal 2009 federal support reflects \$189.6 million from federal ARRA Government Services Funds for department of Corrections operations.

New Jersey: Included in the Department of Corrections' figure is funding for substance abuse programs and rehabilitation services. This has previously been included in the report but erroneously listed as "excluded".

South Carolina: Estimated capital expenditures are no longer collected. Therefore, no capital expenditure data is included for estimated fiscal 2010.

Utah: Expenditure amounts for Corrections do not include any amounts for prison industries. In Utah, Prison Industries is operated as an enterprise fund and does not usually receive support from state appropriations. The prison industry program has been self-sufficient for the last 10 to 15 years.

CHAPTER SIX TRANSPORTATION

7.8% of State Expenditures

Transportation expenditures totaled \$120.1 billion in fiscal 2009, 7.8 percent of total state spending and an increase of 4.3 percent over the previous year. Approximately 56.8 percent of transportation expenditures are funded from earmarked revenues placed in special transportation trust funds, captured in the "Other State Funds" category in this report. The largest earmarked revenue source is the gasoline excise tax. While "Other State Funds" account for the majority of transportation spending, federal funds also play a large role. In fiscal 2009, federal funds accounted for 30.6 percent of total transportation spending, with bonds (8.8 percent) and general funds (3.7 percent) comprising the remaining amount.

Federal funds are estimated to represent an even a greater share (34.4 percent) of total transportation spending in fiscal 2010. This growth is mainly due to increased transportation funds flowing to states through the *American Recovery and Reinvestment Act of 2009* (ARRA). States estimate that in fiscal 2010 they received \$13.5 billion in ARRA funds for transportation. Due to the increased ARRA funds, federal funds for transportation are estimated to grow 22.4 percent in fiscal 2010, while state funds are estimated to decline 2.4 percent. Total transportation spending is expected to increase 8.9 percent in fiscal 2010.

SAFETEA-LU

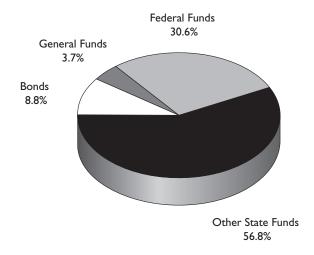

The latest surface transportation law was enacted in August 2005. The law, the Safe, Accountable, Flexible, and Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU) replaced the Transportation Equity Act for the 21st Century (TEA-21). SAFETEA-LU set total surface transportation guaranteed spending

authority at \$286.4 billion for federal fiscal years 2004–2009, with contract authority set at \$295 billion. The funding included approximately \$228 billion for highways, \$52 billion for transit, and nearly \$6 billion for highway safety. Additionally, SAFETEA-LU raised the minimum rate of return on state contributions to the Highway Trust fund from 90.5 percent in 2005 to 92 percent by 2008. SAFETEA-LU expired at the conclusion of federal fiscal year 2009 and, as of October 2010, is being extended temporarily while Congress considers reauthorizing the program.

Fund Shares

The figure below provides fund shares for fiscal 2009.

FUND SOURCE, FISCAL 2009

Regional Expenditures

Table 37 shows percentage changes in transportation expenditures by region between fiscal 2008 and fiscal 2009 and between fiscal 2009 and estimated fiscal 2010. The largest growth in fiscal 2009 occurred in the Plains region.

Transportation—Expenditure Exclusions

Forty states wholly exclude state police and highway patrols from the transportation expenditures contained within the report. Additionally, thirty-eight states wholly or partially exclude port authority operations, twenty-two states omit motor vehicle licensing, twenty-one states exclude truck enforcement regulation programs, and fifteen states exclude gasoline tax and fee collections. For details, see Table 41.

Transportation Notes

Small dollar amounts, when rounded, cause an aberration in the percentage increase. In these instances, the actual dollar amounts should be consulted to determine the exact percentage increase.

Alaska: As of this year's State Expenditure Report submission, Transportation expenditures includes Division of Motor Vehicle costs as well as costs associated with gas tax and fee collections.

Arizona: A portion of the gross "Gasoline Tax & Fee Collections" is distributed to local governments.

Maine: Previous reports inadvertently excluded motor vehicle licensing and gas tax and fee collections from Transportation expenditures. This report includes those costs for all three years of the report. This correction caused the numbers to change only for Other State Funds.

Michigan: Federal revenue support is expected to increase in fiscal 2010 largely due to the continuing expenditure of federal ARRA dollars for state transportation programs. Actual ARRA expenditures will be recorded with the fiscal 2010 annual financial report.

Missouri: Fringe benefits are appropriated and paid centrally and are therefore included in all other expenditures with the exception of retirement and health care costs for Transportation employees and Highway Patrol employees in the Department of Public Safety.

South Carolina: Estimated capital expenditures are no longer collected. Therefore, no capital expenditure data is included for estimated fiscal 2010.

Tennessee: Bond estimates represent bond authorizations, while actual bonds represent bond proceeds utilized.

Virginia: State Police and Highway Patrol funding is included in Public Safety.

CHAPTER SEVEN ALL OTHER EXPENDITURES

33.9% of State Expenditures

The "All Other" category reflects a substantial amount of state spending not included in the categories described in previous chapters. "All Other" spending in states includes the Children's Health Insurance Program (CHIP), institutional and community care for the mentally ill and developmentally disabled, public health programs, employer contributions to pensions and health benefits, economic development, environmental projects, state police, parks and recreation, housing, and general aid to local governments (a list of the items excluded from the "All Other" category is displayed in Table 46).

The "All Other" category of expenditures totaled \$524 billion for fiscal 2009, or 33.9 percent of total state spending. Total spending in the "All Other" category increased 4.7 percent from fiscal 2008 to fiscal 2009, and is estimated to grow by 6.8 percent from fiscal 2009 to fiscal 2010. The total spending increase in the "All Other" category is attributable to the growth in federal funds. While state funds for "All Other" was virtually flat in fiscal 2009 and declined by an estimated 4.5 percent in fiscal 2010, federal funds increased by 21.4 percent in fiscal 2009 and are estimated to increase by 32.9 percent in fiscal 2010

Children's Health Insurance Program

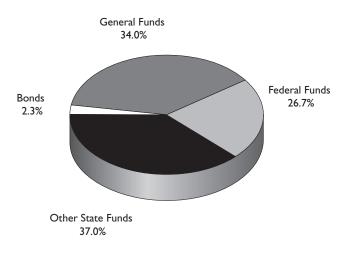

Enacted as part of the *Balanced Budget Act of 1997*, the State Children's Health Insurance Program (SCHIP) expanded health coverage for previously uninsured children. The program is targeted toward children from families with incomes too high to qualify for Medicaid but too low to afford private insurance. SCHIP's original ten-year authorization ran through September 30, 2007. Legislation was signed in January 2008 that extended SCHIP until March 2009 at levels that would provide coverage for the current enrollment population. In February 2009, the Children's Health Insurance Program Reauthorization Act (CHIPRA) was signed into law. Along with renaming the program, the reauthorization act expanded children's coverage and added \$33 billion in federal funds through 2013, financed mostly by increased federal tobacco taxes.

According to the Centers for Medicare and Medicaid Services (CMS), approximately 7.4 million children were enrolled under CHIP during fiscal 2008. As shown in Appendix Table A-2, total spending for CHIP was \$9.7 billion in fiscal 2008, \$10.3 billion in fiscal 2009, and is estimated at \$10.9 billion in fiscal 2010.

Fund Shares

The figure below illustrates fund shares for fiscal 2009.

Figure 19
STATE EXPENDITURES FOR ALL OTHER PROGRAMS BY
FUND SOURCE, FISCAL 2009

Regional Expenditures

The following table shows percentage changes for "All Other" expenditures for fiscal 2008–2009 and 2009–2010 by region. For fiscal 2009, the Rocky Mountain region was well above the national average while the Mid-Atlantic region was well below the national average.

ALL STATES	3	2	0	3	3	4	2	0	12	9

Excluded=X Partially Excluded=P Not Applicable=N/A

All Other Expenditure Notes

Small dollar amounts, when rounded, cause an aberration in the percentage increase. In these instances, the actual dollar amounts should be consulted to determine the exact percentage increase.

Arizona: Some of the "General Aid to Local Government" assistance items are revenue distributions.

Indiana: Expenditure figures for "2010 Estimated – All Other State Expenditures (General Funds)" decreased in part due to HEA 1001 (2008), the Governor's property tax reform legislation whereby the state assumed the responsibility for funding a number of levies previously supported by local property taxes. Consequently, the state eliminated Property Tax Replacement Credits, which previously were included in the "All Other State Expenditures" category.

Maine: Previous reports inadvertently included motor vehicle licensing and gas tax and fee collection costs in All Other expenditures. This report excludes those costs for all three years of the report and instead includes them in Transportation expenditures. This correction caused the numbers to change only for Other State Funds.

Michigan: Public health and community and institutional care for mentally and developmentally disabled persons are partially reported in the Medicaid totals. Federal revenue support increased in fiscal 2009 largely due to the expenditure of federal ARRA funding for a variety of programs. Actual ARRA expenditures will be recorded with the fiscal 2010 annual financial report.

Missouri: Fringe benefits are appropriated and paid centrally and are therefore included in all other expenditures with the exception of retirement and health care costs for Transportation employees and Highway Patrol employees in the Department of Public Safety.

New Jersey: All Other expenditures reflected in this survey do not include a significant amount of related costs incurred by independent authorities such as Higher Education Student Assistance Authority (HESAA), New Jersey Housing and Mortgage Finance Agency (HMFA), etc.

New York: New York budgets most employer contributions to employees' benefits and pensions centrally. The portion of employer contributions to employees' benefits not distributed to an expenditure category has been included in the All Other Expenditures category.

North Carolina: North Carolina was unable to provide All Other figures for estimated fiscal 2010.

Rhode Island: Fiscal 2010 federal funds "All Other State Expenditures" includes an increase in unemployment compensation due to the unemployment extension under the federal stimulus program.

South Carolina: Estimated capital expenditures are no longer collected. Therefore, no capital expenditure data is included for estimated fiscal 2010.

CHAPTER EIGHT CAPITAL EXPENDITURES

Capital expenditures are made for new construction, infrastructure, major repairs and improvements, land purchases and the acquisition of major equipment and existing structures. Minor repairs and routine maintenance are reported as operating expenses. Given the long-term nature of capital projects, states often find it difficult to report capital expenditures for one specific fiscal year. This is because the amount of money appropriated when a project initially is undertaken usually will not be the amount spent in a single year. For greater detail on states' capital spending practices, see the report Capital Budgeting in the States, available at www.nasbo.org in the publications section.

The following chapter includes capital expenditures for higher education, corrections, transportation, environmental projects, housing, and "all other". Due to differences in states' reporting capabilities, or expenditures for items not easily classified, capital expenditures not included in these categories are included in the "All Other" category. Tables 47–53 display capital expenditure data.

Total Capital Expenditures

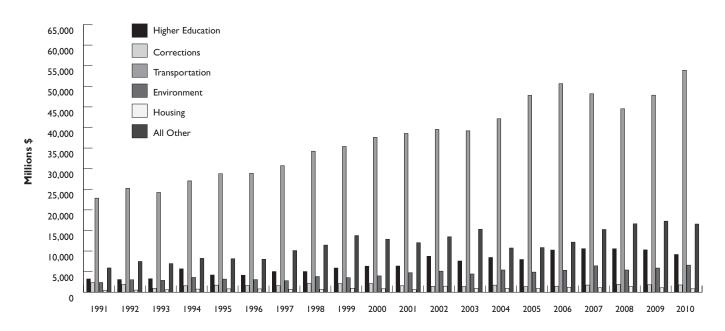

Because of the nature of capital spending, such as long construction timetables and unforeseen or delayed project costs, increases in state spending on capital projects are generally followed by a slowdown or decrease in spending. States decreased capital

spending in fiscal 2008 by 3.5 percent following four straight years of growth. Unlike some previous declines in capital spending, this decline was short-lived. Fiscal 2009 capital spending grew 4.7 percent from fiscal 2008 levels and fiscal 2009 capital spending is estimated to grow 5.5 percent. The increase is partly due to the passage of the *American Recovery and Reinvestment Act of 2009 (ARRA)*. Along with providing increased federal funds to states, ARRA also included a number of bond provisions such as Build America Bonds, Recovery Zone Economic Development Bonds, and School Construction Bonds. While general fund capital spending decreased by 35.4 percent in fiscal 2009 and other state funds grew by a modest 3.3 percent, federal funds increased by 15.3 percent and bonds increased by 10.6 percent. Overall, state capital spending totaled \$80.3 billion in fiscal 2008, \$84.2 billion in fiscal 2009, and is estimated to total \$88.8 billion in fiscal 2010.

Capital Fund Sources

State spending on capital projects traditionally has come from non-general fund sources. Other state funds such as dedicated fees and fund surpluses (35.1 percent in fiscal 2009) and bonds (32.5 percent) combine to account for 67.6 percent of total state spending on capital projects. Federal funds (26.5 percent) and state general funds (5.9 percent) also contribute to capital spending.

Figure 20
CAPITAL EXPENDITURES BY TYPE, FISCAL 1991 TO 2010

Capital Funds by Use

Comprising 56.8 percent (\$47.8 billion) of all capital expenditures in fiscal 2009, **transportation** is the largest category of state capital expenditures. Capital spending for transportation increased by 7.4 percent in fiscal 2009, and is expected to increase by 12.6 percent in fiscal 2010.

Higher education capital expenditures decreased by 2.5 percent in fiscal 2009, totaling \$10.3 billion. In fiscal 2010, higher education capital spending is estimated to decrease by 11 percent. In fiscal 2009, higher education accounted for 12.2 percent of total state capital outlays.

State capital spending for **environmental** purposes in fiscal 2009 totaled \$5.9 billion, 7 percent of total capital spending and an 8.7 percent increase from fiscal 2008. Environmental capital expenditures are estimated to increase 12 percent in fiscal 2010.

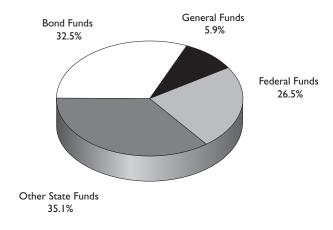

Corrections capital spending experienced a decrease of 3.5 percent in fiscal 2009, totaling \$1.81 billion. Corrections accounted for 2.2 percent of total state capital expenditures. Fiscal 2010 estimates indicate spending of \$1.77 billion, a 2.5 percent decrease.

Housing capital expenditures account for just 1.3 percent of total fiscal 2009 capital spending, at approximately \$1.1 billion. Housing capital spending decreased by 20.5 percent in fiscal 2009, and is estimated to decrease by 22.9 percent in fiscal 2010.

Figure 21
ANNUAL PERCENTAGE CHANGE IN TOTAL CAPITAL EXPENDITURES

State spending for "all other" purposes totaled \$17.3 billion in fiscal 2009, or 20.5 percent of total capital spending. This includes capital expenditures not easily classified into one of the other categories. Examples of expenditures in the "all other" category may include items such as public school facilities, zoo improvements, health care infrastructure, or sports facilities.

Capital Spending Notes

Alabama: Capital expenditures for higher education are not captured/available at the state budget level. Capital expenditures for Environmental and All Other from Federal and Other State Funds are not reported separately, combined amounts are included in the Other State Funds.

Colorado: Colorado financial reports (Colorado Comprehensive Annual Financial Report) do not break expenditures down by program, only by department. Hence, housing and environmental spending may occur within a department but it is not noted here due to the way the information is reported. Capital expenditures of federal funds are not published/available.

Connecticut: Bonds data is based on bond allocations by the State Bond Commission.

Indiana: Transportation capital expenditures for "Other State Funds" increase from zero in fiscal 2009 to \$21M in fiscal 2010 because of a decision by the State Budget Agency and the Indiana General Assembly to move appropriations/expenses previously included in the Indiana Department of Transportation's operating budget to the capital section of the budget bill. These do not reflect an increase of expenditures, but rather a different way of accounting for these capital expenditures.

Maine: Including motor vehicle licensing and gas tax and fee collections in Transportation expenditures instead of All Other expenditures in this year's report did not affect capital spending totals.

Michigan: Higher education capital expenditures made from nonstate funds are excluded.

Missouri: Housing Capital Expenditures do not include expenditures made by the Missouri Housing Development Commission, a body corporate and politic. Road maintenance and construction expenditures are included in the operating figures for the Department of Transportation.

Montana: Capital expenditures are not reported separately but are included in total expenditures.

North Carolina: North Carolina was unable to break out capital expenditures.

Rhode Island: Capital expenditures for "Housing" are under the auspices of the Rhode Island Housing Resources Commission and the Rhode Island Housing and Mortgage Finance Corporation (RIHMFC). Both are quasi-public agencies. Debt service for the Neighborhood Opportunities Program is displayed in the "All Other" category. Issuance and expenditure of GO Bond proceeds totaling \$25.0 million to finance RIHMFC's deferred payment loan program for affordable housing are not displayed in the capital expenditures category. Fiscal 2010 estimated bond funds are based on year-to-date expenditures.

South Carolina: Estimated capital expenditures are no longer collected. Therefore, no capital expenditure data is included for estimated fiscal 2010.

Tennessee: Bond estimates represent bond authorizations, while actual bonds represent bond proceeds utilized.

Utah: Numerous revolving loan programs have been established by the State of Utah. These loan funds are typically provided startup General Fund appropriations when established. Some loan funds receive periodic General Fund appropriations to enhance the loan programs. Once established, loan repayments generally remain within the loan programs in order to provide additional monies for future loans. One revolving loan program provides low-interest loans and grants to Utah residents for low-income housing. This loan fund is the Olene Walker Housing Trust Fund (\$6 million available in fiscal 2008, \$7 million available in fiscal 2009, and \$10 million projected available for fiscal 2010). These funds were shown under capital for housing in previous years, but were reclassified in the 2002 expenditure report to a footnote.

Several revolving loan programs provide low-interest loans to local governments, such as cities and counties, to provide water and sewer systems. These loan funds include: I) Water Resources Construction Fund (\$9 million available in fiscal 2008, \$5 million

available in fiscal 2009, and \$11 million projected available for fiscal 2010); 2) Water Resources Cities Water Loan Fund (\$0 available in fiscal 2008, \$1 million available in fiscal 2009, and \$4 million projected available for fiscal 2010); 3) Water Resources Conservation and Development Fund (\$20 million available in fiscal 2008, \$28 million available in fiscal 2009, and \$44 million projected available for fiscal 2010); 4) Water Quality Loan Fund (\$18 million available in fiscal 2008, \$29 million available in fiscal 2009, and \$37 million projected available for fiscal 2010); and 5) Drinking Water Loan Fund (\$14 million available in fiscal 2008, \$20 million available in fiscal 2009, and \$32 million projected available for fiscal 2010).

All numerical information presented represents bond "expenditures". All bond information included in the report is for General Obligation bonds. Not included in the report is State Building Ownership Authority (SBOA) Revenue Bonds or Board of Regents Revenue Bonds.

CHAPTER NINE REVENUE SOURCES IN THE GENERAL FUND

General fund revenue, the source of most state expenditures, totaled \$603.3 billion in fiscal 2009. The three main sources of general fund revenue, personal income taxes, sales and compensating use taxes, and corporate income taxes accounted for 79.5 percent of general fund collections. Specifically, personal income taxes accounted for 40.3 percent of the total, sales and compensating use taxes for 32.4 percent, and corporate income taxes for 6.8 percent of total general fund revenues in 2009. Other taxes and fees represent 19.7 percent of general fund revenues, while gaming taxes were 0.8 percent. The major sources of general fund revenues are displayed by state in Table 54.

Depending on the state, "other taxes and fees" may include cigarette and tobacco taxes, alcoholic beverage taxes, insurance premiums, severance taxes, licenses and fees for permits, inheritances taxes, and charges for state-provided services.

States use a variety of taxes and fees to finance programs, not all of which are reflected in the general fund. These include some gaming taxes, lottery proceeds, and motor vehicle fees, which often are earmarked for special purposes or specific funds, such as education or roads.

Table 55 illustrates the major items that are excluded from general fund revenue sources. For example, property taxes are a mainstay of local government finance and the majority of states exclude them from both their general funds and their revenue bases. However, many states use aid to local governments or other subsidies to help reduce the amount of property taxes local governments collect.

State Tax Collection Trends

State general fund revenues declined sharply in fiscal 2009 and fiscal 2010 due to the downturn in the national economy. States collected \$670.5 billion in general fund revenues in fiscal 2008, but that total fell to \$603.3 billion in fiscal 2009 and fell even further in fiscal 2010 to an estimated \$592 billion. In total, revenues declined \$78.5 billion during the two-year period. On a percentage basis, revenues declined 10 percent in fiscal 2009 compared to fiscal 2008, and are estimated to have declined an additional 1.9 percent in fiscal 2010.

Unlike some previous recessions, all of the various sources of state revenue have experienced sharp declines since fiscal 2008. Corporate income taxes have experienced the largest two-year decline at 24.8 percent, followed by personal income tax at 14.9 percent, other taxes and fees at 8.8 percent, sales tax at 6.5 percent, and gaming tax at 4.6 percent.

Revenue Sources in the General Fund

Alabama: Fiscal 2008 revenue amounts exclude a transfer from the Proration Prevention Fund of \$439,372,515. Fiscal 2009 revenue amounts exclude a transfer from the Proration Prevention Fund of \$129,590 and a transfer from the Education Trust Fund Rainy Day Account of \$221,136,679.

Alaska: As of this year's State Expenditure Report submission, Alaska is reporting \$0 under Sales and Compensating Use Taxes; this is a departure from recent years' erroneous reporting in this column. The Other Taxes and Total columns excludes unrestricted investment revenue.

Colorado: A portion of gaming taxes were diverted to the general fund due to budgetary constraints in fiscal 2008-09 and fiscal 2009-10. Fiscal pressures in fiscal 2007-08 did not exist and did not require gaming revenues to be diverted to the general fund. Only state sales taxes on lottery sales were included in the general fund. Motor fuel use taxes are collected as cash funds and are not part of the general fund. Property taxes are collected at the local government level. State sales taxes on energy sales and use were collected for a portion of fiscal 2009-10 as part of a budget balancing measure (suspending this sales tax exemption). Severance taxes are collected as cash funds and are not part of the general fund. In addition to annual federal assistance for public benefits, discretionary and non-discretionary ARRA funds were used to balance FY 2008-09 and FY 2009-10 budgets. Licensing fees are collected as cash funds and are not part of the general fund. Other revenue includes parimutuel and court receipts.

Indiana: Revenue figures for "2008 Actual - Sales and Compensating Use Taxes" include 2 months of sales tax revenue at 7%, rather than 6% (\$151.6 million). The sales tax was increased from 6% to 7% on April 1, 2008 as part of HEA 1001

(2008), the Governor's property tax reform legislation whereby the state assumed the responsibility for funding a number of levies previously supported by local property taxes. Revenue figures for "2009 Actual - Sales and Compensating Use Taxes" include a full year of sales tax revenue at 7%, rather than 6% (\$879.0 million). Revenue figures for "2009 Actual - Gaming Taxes" include \$62.8 million of Racino Wagering Taxes collected between January 1st and June 30th of 2009. HEA 1001 (2008) directed these revenues to the General Fund beginning January I, 2009, as part of the Governor's property tax reform legislation. Revenue figures for "2009 Actual - Other Taxes and Fees" include \$25.8 million of revenues from HEA 1001 (2008), including \$12.8 million from the Riverboat Admissions Tax and \$13.0 million from the Motor Vehicle Excise Tax and FIT. HEA 1001 (2008) directed these revenues to the General Fund beginning January 1, 2009, as part of the Governor's property tax reform legislation. Normalizing for the impact of HEA 1001 (2008), "2009 Actual" revenues decreased by 7.4% compared with "2008 Actual" revenues, and "2010 Estimated" revenues decreased by 5.6% compared with "2009 Actual" revenues.

Michigan: Actual fiscal 2008 and fiscal 2009 amounts reflect general fund non-dedicated revenue as contained in the respective State of Michigan Comprehensive Annual Financial Reports. Effective for fiscal 2010, a temporary casino tax enacted in fiscal 2004 will no longer be in effect; all casino tax revenue received by the state will be deposited to the School Aid Fund. Revenue figures have been adjusted to put them on a basis comparable to the consensus estimates. Fiscal 2010 estimates are the May 2010 consensus revenue estimates.

Missouri: Revenue sources exclude refunds of \$1,258 million in fiscal 2008, \$1,441 million in fiscal 2009, and \$1,469 million in fiscal 2010.

Children's Health Insurance Block Grants

California: Included in the actual General Fund amount for FFY 2008 & 2009 are the prenatal expenditures which Proposition 99 Funds are used as the match to the federal funds.

Connecticut: CHIP Appropriation is "gross funded": federal funds are deposited directly to the State Treasury. Connecticut's FMAP is currently at 65 percent of CHIP benefit costs.

Michigan: Michigan received federal approval of the Adult Benefit Waiver (ABW) to expand health care coverage to childless adults using SCHIP funds in fiscal 2004. As of January 1, 2010, the ABW

program was converted to a Medicaid (Title XIX) financed waiver. Enrollment in the traditional program for children ("MIChild") has grown from an average 29,800 in fiscal 2008 to 30,600 in the third quarter of fiscal 2010.

Missouri: Medicaid and SCHIP data are from the CMS 64 Report used for federal reporting of Medicaid expenditures. The split between the General Revenue Fund and Other Funds is an estimate.

Tennessee: Tennessee began receiving funds for the Child Health Insurance Block Grant in fiscal 2007.

Medicare Part D Clawback Notes

Montana: For fiscal 2010, the ARRA enhanced FMAP reduced the premium payable by states.

New Jersey: 2010 estimate is net of clawback reduction savings.

New York: Fiscal 2009 annual decrease in clawback payments reflects the prepayment of fiscal 2009 payments during fiscal 2008.

North Dakota: Clawback for state fiscal year 2010 is the estimated amount to be paid, and therefore is net of the ARRA credit.

Methodology

The Fiscal Year 2009 State Expenditure Report reflects three years of data: actual fiscal year 2008, actual fiscal year 2009, and estimated fiscal year 2010. The text of this report focuses on actual fiscal year 2009 data, with a secondary focus on estimated fiscal 2010.

This report documents state expenditures in six functional categories: elementary and secondary education, higher education, public assistance including Temporary Assistance for Needy Families and other cash assistance, Medicaid, corrections, and transportation. All other expenditures make up a seventh category. The report includes expenditures from four fund sources, including general funds, federal funds, other state funds, and bonds. States were asked to include spending from the American Recovery and Reinvestment Act of 2009 (ARRA) in the federal funds totals for the seven categories. Data for each category typically include employer contributions to current employees' pensions and to employee health benefits for employees.

Elementary and secondary education spending includes state and federal fund expenditures only, and excludes local funds raised for education purposes. States also were asked to include, where applicable, state expenditures that support the state's Department of Education, transportation of school children, adult literacy programs, handicapped education programs, programs for other special populations (i.e., gifted and talented programs), anti-drug programs, and vocational education. States were asked to exclude spending for day care programs in the school system and spending for school health and immunization programs.

For higher education, states were requested to include expenditures made for capital construction, community colleges, vocational education, law, medical, veterinary, nursing and technical schools, and assistance to private colleges and universities, as well as tuition, fees and student loan programs. Higher education expenditures exclude federal research grants and endowments to universities.

Spending for public assistance includes expenditures for cash assistance under the Temporary Assistance for Needy Families (TANF) program and other cash assistance (i.e., state supplements to the Supplemental Security Income program, general or emergency assistance). States were asked to exclude administrative costs from reported expenditures.

Medicaid spending amounts exclude administrative costs, but include spending from state funds, federal matching funds and other funds and revenue sources used as a Medicaid match such as

provider taxes, fees, assessments, donations, and local funds. Medicare Part D clawback payments are included in a state's overall Medicaid expenditures, and are also listed separately in the Appendix.

For corrections, states were asked to include, where applicable, expenditures for capital construction, aid to local governments for jails, parole programs, prison industries, and community corrections, as well as expenditures made for juvenile correction programs. States were asked to exclude expenditures for drug abuse rehabilitation programs and institutions for the criminally insane.

Transportation figures include capital and operating expenditures for highways, mass transit, and airports. States were also asked to include expenditures for road assistance to local governments, the administration of the Department of Transportation, truck and train/railroad programs, motor vehicle licensing, and gas tax and fee collection. The data exclude spending for port authorities, state police and highway patrol.

The "all other" expenditure category includes all remaining programs not captured in the functional categories previously described, including the Children's Health Insurance Program and any debt service for other state programs (i.e., environmental projects, housing). States with lotteries were asked to exclude prizes paid to lottery winners. States were also asked to exclude expenditures for state-owned utilities and liquor stores.

Capital spending is included with operating expenditures within each functional category, unless otherwise noted. Capital expenditures have also been collected separately in the following categories: corrections, environmental projects, higher education, housing, and transportation. Capital expenditure data can be found in Chapter Eight.

Chapter Nine illustrates the major sources of state revenue including sales taxes, personal income taxes, corporate income taxes, gaming taxes, and other taxes and fees. This chapter only contains information on general fund revenue.

Tables included in four of the functional categories reflect expenditures that states have excluded from their reported data. Each table underscores the observation that state-to-state expenditure comparisons in any functional category can be misleading. For example, one state may have included its juvenile institutions in its corrections budget, while another state may have included them in its human resources budget. Comparisons for one state over time, however, should prove accurate.

All years reported are state fiscal years unless otherwise indicated. In 46 states the fiscal year begins on July I and ends on June 30. The exceptions are as follows: in Texas, the fiscal year begins on September I; in Alabama and Michigan the fiscal year begins on October I; and in New York, the fiscal year begins on April I. Additionally, the length of budget cycles vary among states, with more than half of the states budgeting annually and the remainder enacting biennial budgets.

Definitions

General Fund: predominant fund for financing a state's operations. Revenues are received from broad-based state taxes. There are differences in how specific functions are financed from state to state, however:

Federal Funds: funds received directly from the federal government.

Other State Funds: expenditures from revenue sources, which are restricted by law for particular governmental functions or activities. For example, a gasoline tax dedicated to a highway trust fund would appear in the "Other State Funds" column (Note: For Medicaid, other state funds include provider taxes, fees, donations, assessments and local funds).

Bonds: expenditures from the sale of bonds, generally for capital projects.

State Funds: general fund plus other state fund spending, excluding state spending from bonds.
